Manager Loose Believes This Will Open Quickly Into Big Producer.

"There is not a great deal to say that has not already been said, but the mine is looking good and I still believe that in the Gold Chain property I will develop a big mine quicker than I ever have," said Colonel C. E. Loote, general manager of this organization, who was in the city Friday from his Provo home. There is a great deal of interest being taken in the Gold Chain property and in its neighbor as well, the Opolongo, between which companies is an agreement in regard to the future that climinates of the South Columbus Consolidated Mining company, held by the South Columbus Consolidated Mining company held by ou. The management of the Union Chief company of the Santaquin district on Friday received the settlement for the first lot of ore to the local market, the lot of sixty-three tons bringing \$1769 smelternet. There is a good tonnage of this grade of ore developed in the mine, and the smelters pronounce it is as fine a quality of silver-lead ore as could be imagined. The Union Chief property looks as if it is one of the big finds of the year in mining.

Ore and Bullion.

The ore and bullion report for Friday, given by McCornick & Co. was as follows: Ore received, \$120,000; bullion shipped, \$40,000; total, \$160,000.

# OHIO COPPER MILL DOES GREAT WORK

Daily Capacity of Plant Is Being Increased With Each Month.

This is the age of surprises in the opper mining world, and Utah has a few uch propositions, among them being the SHOCK TO STOCK Ohio Copper, which are pounding out results of greater magnitude than the oficials planned on paper. In the first section of the Lark plant of the Ohio com-puny, which is the first half of the mill, the management has been increasing the daily amount of ore handled, the present capacity being 1850 tone, which was 1700 tons when last reported the first of last month. Property in Worse Shape Than

tons when last reported the first of last month.

General Manager Al Frank stated on Friday that when the mill was in completed form the management will be able to send over 4000 tons through the plant. The management is busily engaged in installing the new tables and other equipment for the second half, and the parts of the crushing department to be furnished by Colonel Wall for the third unit are being prepared in this city as fast as the work can be done.
